4 FAQ

Q:You cannot surf internet after setting up successfully?
A:Pls check the password whether is right .If not, pls enter the right password.
Q:The network speed is very slow after setting up successfully?
A:Pls enter the device status page to check whether the "Equipment and the main AP distance" is fit. If not, you can adjust the position of the repeater
How to check the status page: after connecting the extended WiFi successfully, you can enter the IP address 192.168.10.1 on mobile's browser or on PC to check the status of the repeater.
Note:Pls make sure that the IP address from upper network can't be 192.168.10.1
