1 The Product Description

1.1、 Description of product interface indicator：

Signal ······· Signal Indicator
WPS ······· WPS Indicator
PWR ······· Power Indicator

WPS/RESET Button

OFF/ON Button

Product Installation

Notice: Notice: If the router has WPS button,you'd better choose the WPS "one key to repeater" to set up (See 2.1.1). If not, pls enter the IP address 192.168.10.1 to set up (See 2.2.1).

2.1 Press WPS on repeater and match automatically

2.1.1 Plug the wifi repeater on outlet near the wifi router. Press the WPS button on the main router for 1 - 2s. Then, press the WPS button on the repeater for 1 - 2s within 50s(ASAP). Wait for about 30s, the repeater will repeat automatically. The WIFI lamp will go out for a while and light up again when repeat successfully. Finally, a new extended WiFi named as "your original wifi name-Plus" will show on your wifi list. (eg: xxxxx-Plus)

one key to repeater

Press the WPS button for only 1-2s.

Pls make sure that it didn't repeat other router net when you press the WPS to repeat. Otherwise you will have to press the Reset button to restore factory settings.

Notice:
Please check the button on the router is the WPS or QSS.
Please check whether the WPS on the router is open(Enter the router interface to check)
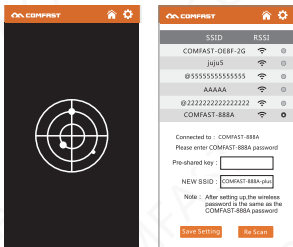

2.2 Product Installation

2.2.1 Power on the device, then wait for 30 seconds. Please connect your phone to WiFi SSID.
（Defaults: COMFAST-XXXXXX）

2.2.2、Please enter 192.168.10.1 in the browser, then input "admin" and your password.

2.2.3、The repeater wifi scan page will appear automcatically after password setting. Choose the wifi SSID to booster, then input the password of this wifi SSID.

2.2.4、Reconnect the phone to access the Internet. Password is the password of upper router. The SSID will add "-plus" of the upper router SSID.

3 FAQ

Q:Can not access to internet after setting?
A: If indicator is off, it means the setting fails.
   Please check if the password is correct, and enter the
   correct one.
Q: Low speed after setting?
A: Please check the status of indicators:
   Blue--Strong signal
   Red--Weak signal
   The distance between router and repeater is too far, please
   adjust the position of the wifi repeater.

How to reset: Please wait 1 minute to restart after the device
power on. Then press the reset button for 6-7 seconds, the
indicator will flicker one time, now release the button, waiting
for system to reset.

WPS: Please press the WPS button, the light will flicker for
120 seconds till the client connected. WPS only support mobile
phone(Apple is not supported)
