## 2 Product Installation

2.1 It is defaulted to Repeater Mode. ( Do not connect the Ethernet port to router directly).

2.2 Connect the WiFi signal by mobile or connect the device with computer by cable.

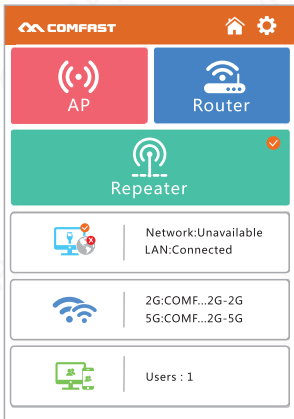

2.3 Open browser and input 192.168.10.1 to get to the login page. Only first login need set password.

 English icon is for language setting.

2.4 After setting password, it will get to scan available signal automatically. (If you want to change the mode, please wait scanning finished and click the home icon  to set). Choose the SSID you want to repeat, and input the router password to finish repeating settings. ( Note: The defaulted network segment is 192.168.10.1, if the superior network is also 192.168.10.1, please modify the network segment of device or superior first, or connect under bridge mode in the Advanced Setting).

2.5 In home page, there are three modes to choose, the Repeater Mode, the AP Mode and Router Mode (PPPoE, Static IP, DHCP). If needs Bridge Mode, please go to Advanced Mode 

2.6 Click Repeater Mode, it will scan available WiFi signal. After 10-15s, it will show available WiFi list. Choose the one you want to repeat and input the router password to finish repeating settings.

( Note: The defaulted network segment is 192.168.10.1, if the superior network is also 192.168.10.1, please modify the network segment of device or superior first, or connect under bridge mode in the Advanced Setting).

### 3 FAQ

**Q:**You cannot surf internet after setting up successfully?

**A:**If the device status light is red, the device does not extend successfully. Pls check the password whether is right .If not, pls enter the right password.

**Q:**The network speed is very slow after setting up successfully?

**A:**Pls check the status of the device lamp. If the lamp is yellow, it indicates that the device and the main road are far away from the main road, you can adjust the position of the repeater.

How to check the status page: after connecting the extended WiFi successfully, you can enter the IP address 192.168.10.1 on mobile's browser or on PC to check the so-state page of the repeater.
